

## **For creative aesthetes: 48-piece Polychromos Set in a Wooden Case**

Just as decorative as it is practical: A noble, handcrafted wooden case is a worthy place to store the new edition of Polychromos pencils. 48 high-quality artists' pencils in a wide range of shades are waiting to be put to creative use – at home, in the studio or on the road. The case also contains a few useful accessories for first drafts: two Faber-Castell 9000 pencils, a double sharpener and a rubber. The two metal fasteners on the case ensure that the contents remain firmly in place.

The high-quality pigments found in Polychromos artists' pencils guarantee the best possible lightfastness and ensure extraordinary vibrancy that lasts for decades. The 3.8 mm leads, which are specially bonded to make them break-proof, impress with a particularly soft, strong colour laydown. Smudge-proof, water resistant Polychromos colour pencils can be used to create fascinating shading effects ranging from light transparent hues to dark opaque tones by superimposing different colours. The stylish case is a feast for the eyes of any creative aesthete and is an exceptional gift idea.

48 Polychromos artists' pencils and accessories, in a wooden case, **EUR 140**
